Subject: Testimony for 210461

Members of the TIO Committee:

My name is Johanna Kelley and I'm a resident of the 5th District. I am drafting this legislation to express my staunch support for Resolution #210461.

It is my understanding that part of the reason this legislation was held is because of concerns from parents. As the mother of two young daughters, the biggest concern I have is stalling this legislation.

I want to express my support of this legislation because of its inclusion of language which will help expand access to menstrual hygiene products. No one should worry about their ability to access these products, especially on city-owned property. Kansas City is overdue in approaching these issues.

I strongly support this legislation and ask the members of the committee to vote in favor of the measure.

Johanna Kelley
