Hi my name is Rhondda and I live in the KC district. I urge the council to vote no on Resolution 220442 because fossil gas cannot solve the climate crisis. We need extensive renewable energy infrastructure to support Kansas City without destroying the climate. Fossil gas emits GHGs, pollutes our air and has the risk of plant explosions. Fossil gas is also bad because ruins the climate and hazardous for peoples lives. We need to be eliminating fossil fuels not promoting it. Lets move in the right direction and invest in renewable energy
