Subject: Gas is not green energy

EXTERNAL: This email originated from outside the kcmo.org organization. Use caution and examine the sender address before replying or clicking links.

I am a resident of the fourth district and I am dismayed to hear that the City Council is considering Resolution 220442 that declares gas a “balanced energy choice.”

Gas is a fossil fuel, NOT an environmentally friendly alternative. Producing the fuel releases a good deal of methane and the fuel itself exacerbates asthma. Using this fossil fuel will increase the climate crisis and undo your efforts to make Kansas City a green city.

I urgently ask you to JUST SAY NO, and to move Kansas City and the planet into a livable future for our kids and grandkids.

Sincerely,

Amrita Burdick
