

Hi

I opposed ordinance 230891

. The reasons to oppose are:

- I don't want Spire to raise my gas rates on a renewable natural gas facility that goes against KC's climate plan.
- We need to be moving away from burning gas in homes and buildings, not spending millions in public money on more gas infrastructure.

This is one of the things we fought hardest to keep out of the climate plan. Apparently KC Water is trying to push this through because Spire is going to pay them about \$1 million per year!! No fair!!
