Subject: Climate action plan in KC
Date: Monday, August 22, 2022 12:39:59 PM

It is vitally important for KC to lead the way for cities to comply with the Paris agreements on carbon dioxide. This will position KC as a model city, not only for her nationwide status, but also to do her part in making the planet cleaner and more liveable for future generations. It will also draw diversely skilled individuals to make KC their homes so the city can prosper with regard to everything from transportation to arts to industry. This will be a city we all want to live in!
