Discussion

Provisional data through September 2022 reveal 11 cases of active tuberculosis (TB) and greater than 500 latent tuberculosis infections (LTBI) in Kansas City, Missouri. Each case of active disease must be treated with sufficient antibiotics to eliminate transmission to others while also thoroughly investigated to determine if exposure to others has occurred. These investigations also serve to find additional cases of both active disease and LTBI in the community. Individuals with LTBI are offered preventive treatment to reduce the chance of developing active disease later in life. This contract provides funds to assist with investigations as well as to provide "Directly Observed Therapy" (DOT) to ensure compliance and adequate treatment of the cases.
