- Law Department
- City Communications
- City Clerk's Office
- City Planning and Development

Guiding Principles for the City's Redistricting Process -

Section 203(b) of the City's Charter provides that "The Council shall draw new districts, based upon the last official federal census, not later than the last day of December of the year of the publication of the official federal census."

- 1. Provide for equality in the political process.
 - This is done through the rule of one-person one-vote
- 2. Create "ideal" districts.
 - Kansas City's population is 508,090. An ideal district is, therefore, 84,681 people.
- 3. Understanding the 10% rule.
 - Recognizing that all districts cannot be the identical size, it is permissible to have districts that deviate by no more than 10% between the largest district and the smallest district.
- 4. Draw districts that are compact and contiguous.
- 5. Be mindful of Voting Rights Act implications.
 - There must be a racial or ethnic minority group that is sufficiently large and geographically compact to be a majority in a district
 - The group must be politically cohesive
 - The white majority engages in bloc voting to defeat the preferred candidate of the minority group.

Population Trends

Population Reflects 2020 Kansas City, MO City Limits with Historic Decennial Census Totals

1966

Population Pop. Per District
475,539 79,000

- Ilus Davis, Mayor of Kansas City, MO 1963 1971

Commission Priorities-

- Be Supportive of Voting Rights Act
 - Maintain 3rd & 5th Districts as Black or African American Majority
- Create Boundaries that Enhance Hispanic
 Representation in District 4
- Enhance Overall Representation
- Create Balanced Districts
 - 10% Rule One Person, One Vote
- Respect Existing Boundaries & Patterns
 - Neighborhood, Institutional, Social
- Focus on Human Impact
 - Engage the Public
 - Utilize Community Feedback
 - Use Plain Language
 - Be Transparent

Rationale & Considerations—

- Kansas City's population grew by 10.5% to 508,090. New growth elevates the number of residents per district to 84, 682 from 76,500 in 2011.
- Exponential growth in Districts 1,2, and 4 requires population shedding in those districts
- Districts 3, 5, and 6 need to add thousands of residents to produce balanced districts.
- The City's Geography: 320 square miles, irregular shape, 4 cities within KCMO, 14 school districts, and the Missouri River.
- Preserving the African-American majority in Districts 3 and 5 pursuant to the Voting Rights Act.
- Bolstering Latinx representation in District 4 by keeping community groups together.
- Pushing the southern and western border of District 5, significantly altering the southern part of the City.
- Raising the northern boundary of District 6 from 59th St. to 43rd St. to gain the necessary population for a balanced district.
- Adding more population north of the river to District 4 therefore increasing the diversity within the District.
- Moving the Country Club Plaza, UMKC and other notable institutions from District 4 to District 6.
- Improving representation of northland residents that live south of Barry Rd./Hwy. 152 based on socio-economic status.
- Preserving Troost Ave. as a dividing Council District line.

Challenges

- The City's Geography: approximately 320 square miles, irregular shape, 4 cities within KCMO, 14 school districts, and the Missouri river.
- Exponential growth in the Districts 1, 2 and 4.
- Protecting minority voting rights and representation.
- Keeping neighborhoods, school districts, and voting precincts together.
- Competition over resources between newer parts of the city for development and older parts of the city for redevelopment.
- Each of the 6 council districts have multiple, and sometimes unrelated or competitive issues to address due to size.

Minority Report

- Concentration of growth north of Hwy 152 will unbalance population numbers.
- Horizontal configuration will split school districts into different council districts.
- Horizontal configuration will divide council districts into different counties, creating new obstacles to collaborative funding.
- Horizontal configuration creates an impediment to racial and socio-economic diversity and inclusivity.
- A large portion of Northland support for the horizontal configuration was from the 64117 zip code; limited perspective is concerning.

Overview

Purpose "leg"

Change Significant change for district 5 & district 6

Compactness Vields moderately compact districts; Creates broad district 5 & district 5

Natural Feature(s) 1 district spans Mo. River

22% Hispanic in district 3

Representation 19% Hispanic in district 4

52% Black or African American in district 3

57% Black or African American in district 5

10% Rule 3%

Recommendation for Charter Review Commission

Pursuant to Sec. 1212 of the City Charter, the Redistricting Commission recommends that the Mayor appoint a Charter Review Commission to study and evaluate increasing the number of Council Districts to provide for greater representation of all Kansas City Residents.
