<p>Discussion <i>(including relationship to other Council actions)</i></p> <p>On February 10, 2019, a water main burst and caused property damage at 3401 Terrace Street, Kansas City, Missouri. The main break was located one block west of the property. A steep, heavily wooded hill separates the property from the break. Water from the break flowed down the hill and into the building's chipseal parking lot. The amount of water involved greatly undermined the lot which caused heaving and separation in its surface. The claimant has been reimbursed for damages to his building. The City hired ServPro East Independence/Blue Springs to repair the lot and the drainage system beneath the lot. This payment is for that work. This amount requires City Council approval</p>
