Description of work:

Project purpose is to reduce combined sewer overflow frequency and volume within 2 smaller storm sewer watersheds within the larger Town Fork Creek watershed. Two different approaches within each smaller watershed are being proposed with this project: 1 - Work in Blenheim Park includes separating and directing storm flow into new green infrastructure infiltration basins to be located within the park. 2 - Work on 51st Street to the west of Satchel Paige Stadium consists of constructing a separate storm sewer system from Agnes to Indiana and includes pavement/sidewalk restoration.
