Executive Summary

Adopting the KCI Proposed Land Use Plan map and future land use categories applicable to the changes for the area generally within areas adjacent to the airport from the northern City limit to roughly 152 on the south and from Platte/Clay County boundary on the east to the western City limit.

Discussion

Kansas City is divided into 18 geographic areas for which area plans have been prepared. The KCI Area Plan was adopted by the City Council in June 2009 by Ordinance No. 090395. Area Plans typically have a lifespan of 10 years; therefore it is time for a new KCI Area Plan to guide the physical development of the area through 2035. Area plans recommend strategies to help realize a community's long-term vision for the future and provide a comprehensive framework to guide public decisions on land use, public spaces, mobility, housing, and public improvements. Area plans provide both proactive strategies (phased action steps which may become projects and are outcome driven) and reactive guidelines (evaluation tools to guide future decision making, as well as a foundation for zoning). These plans are used by the city and the community alike and implement at a local level the elements of the City's Comprehensive Plan (KC Spirit Playbook).

The update of the KCI Area Plan marks the beginning of a multi-year effort to update all 18 of Kansas City's area plans. Staff is starting the process with bringing forward for adoption the Proposed Land Use map for the KCI area plan. The KCI Area Plan is one of the oldest (adopted in 2009), and the MCI Airport is concurrently updating its master plan. The rest of the KCI Area Plan – the full land use chapter and chapters on mobility, housing, environment and public improvements will be brought forward to City Planning Commission and City Council later this year and could result in some more changes to the proposed land use map based on thorough analyses of the aforementioned subjects.

The reason that the Proposed Land Use map is being brought forward before the rest of the KCI Area Plan is that a moratorium on new "M" (manufacturing) zoning was enacted through Ordinance No. 241073 until July 16th, 2025, in response to concerns about

increasing industrial development pressures in the area and potential impacts to area neighborhoods. The ordinance also directs staff to present proposed revisions to the Proposed Land Use Plan to the City Plan Commission and City Council before July 16th. To meet this directive, staff has front-loaded the update process with overall visioning then subsequently focusing on land use-specific discussions, resulting in recommended revisions to the Proposed Land Use map.

The draft proposed land use plan identifies specific land use types and densities for all locations in the KCI area. It is intended to prevent future land use conflicts and plan for the orderly and predictable development of the area. It is also a reflection of the community's values and aspirations for the future development of the area. The proposed land use plan is used to guide future zoning and development decisions; however, it does not represent a change to existing zoning.
