

Dear Public Testimony,

I'm writing to ask you to oppose Ordinance 250382. While I commend the city council for its attention to the KCATA funding shortfall, Ordinance 250382 will force major cuts to long-term "Vision Zero" and bicycle investments to provide a short-term funding patch that will not resolve any of the underlying funding issues. The vision zero program and bicycle programs are already behind schedule - these proposed cuts will only worsen those delays. Please do not defund these improvements just because this long-foreseen shortfall was allowed to develop into an emergency.

Regards,

Peter Kintner
