**Description of work:**

This Contract entails preventative scheduled and rapid unscheduled response maintenance and repair work on the City's flood warning instrumentation in field and in system. Fields sites are small and turn key electronics bought through one vendor with bi-annual calibration needs for field sensors at those sites. System supports City Emergency Response for road closure, voluntary and mandatory evacuations due to flooding from heavy, usually flash flooding with minimal response time in many situations. Historically only ~ 1% of this contract's total cost has been in prevailing wage based work. Assuming 5% Prevailing wage by hours for 5 years (from the prior 3.22 year contract record) gives a total prevailing wage hours of: 255 hours of work, over 5 years (if annually renewed that long) that would be prevailing wage work. Prevailing wage is only for splicing of wires, relocation of site conduit, standpipes or sensors or other extremely rare notable improvements that fit Prevailing wage rules. This contract is primarily a maintenance, calibration and equipment replacement/repair contract. Most equipment dollars are for the High Sierra Instrumentation used within the flood warning sites. All equipment is turn-key and interchangeable. **WSD is requesting 0% MBE/WBE goals based on this project being too specialized to subcontract any of the work out.**
