---

Dear Council Members,

I am in favor of adding this back. We have had two summers of excessive noise downtown from people who don't live here who think it is a playground for them to come and do as they please. Combine this with absentee landlords who can't be contacted and don't care means KCPD can neither impose trusspassing citations nor site for noise code violations. This bill would give the power back to cite noise violations again. This we hope will give us a tool to take back our nights downtown in residential areas that aren't parts of entertainment districts.
