

Dear Public Testimony,

I'm writing to ask you to oppose Ordinance 250382. From my understanding of this ordinance, this would not aid in finding a sustainable, long term solution for funding public transit in our community. Public transit has long been neglected in KC and the proposed solution in this ordinance appears to only further the neglect instead of doing something that works towards finding a real solution. It should be time, especially with the World Cup looming, that leaders in our community step up and do something that ignites real, positive change. Ordinances like this proposed one are part of the reason why KC and KCATA are in the financial situation they are in, which is not a good one.

Regards,
Will Mansfield
