

250890

Hi my name is Kassandra Kizlin. I'm a resident of KC in the 5th district. I'm writing today to oppose the ordinance proposals for a new temporary jail.

Instead of investing in a temporary jail, I'd like to see money go toward long term solutions that provide stable housing, mental and general health supports, and economic stability for those who may be likely to commit a city offense. The World Cup isnt worth it.

We have an opportunity in KC to create new methods of care and accountability that actually address root causes of harm for the future of our city, not just an illusion of safety for the World Cup. As of right now, I'm very worried that this council is not doing enough to explore new possibilities that would actually help our community.

As members of this council, you have the opportunity to set the tone for all of Kansas City. This is your chance to take seriously the need for new approaches to addressing the issue of incarceration and harm in KC. We can't afford to do more of the same. Vote NO on ordinance 250890.

Sincerely,

Kassandra Kizlin
