	How will this contribute to a sustainable Kansas City?	This project consists of public and private improvements for a 46 lot single-family residential development, A private open space tract on approximately 14.852 acres of previously undeveloped property. The private open space will also retain much of the existing natural vegetation and natural waterways. Common areas will be maintained by the homeowners' association through a covenant agreement. Modern and safe, walkable streets with sidewalks, curb and gutter and street lights will be constructed. New sanitary sewers will be constructed that will minimize infiltration and inflow within the system conveyed to the treatment facility. Homeowners must adhere to the codes, covenants and restrictions prepared for the project to assure ongoing maintenance and upkeep of their personal residences and common properties. This development will increase the tax base for the developed lots and will provide permanent greenspace within the development. Written by Lucas Kaspar, PE
