Policy/Program Impact

Policy or Program Emphasis Change	☒ No ☐ Yes
Operational Impact Assessment	

(Continued on reverse side)

Is it good for the children?
Yes. The project utilized recycled hot mix asphalt which requires less virgin asphaltic cement and rock. It also allows the use of warm mix technologies which reduces the amount of fuel needed to produce the asphalt and release harmful gases.

How will this contribute to a sustainable Kansas City?
This contract utilizes recycled asphalt pavement in the production of the new asphalt that is place on the roads. This reduces the amount of virgin rock and liquid asphalt that is needed to complete the resurfacing.
