I support Ordinance 250637.

I'm delighted that KC is ready to update the old nuisance code in ways that will improve the health and biodiversity of our city. In particular I applaud the definition of *managed natural landscape* to permit the enjoyment of plants growing to their “natural height and form”. This key revision will allow the full lifecycle of plants to play out, which in turn allows the full ecosystem of species, human and otherwise, to thrive interdependently as nature has always intended. It constitutes real progress toward goals outlined in the Playbook and CPRP.

Thank you for your thoughtful work on these ordinance improvements.
