88-110-06-4 TWO-UNIT HOUSES AND SEMI-ATTACHED HOUSES ON CORNER LOTS

Under the conventional development option, two-unit houses and semi-attached houses are subject to the standards of Section 88-110-06-B (Table 110-2). In approved open space or conservation developments two-unit houses and semi-attached houses are allowed on corner lots in all R districts except R-80. In R-10, R-7.5 and R-6 districts they are subject to the following additional standards.

(a) Two-unit houses and semi-attached houses are allowed on corner lots in situations in which such building types would not otherwise be allowed because they can be designed so each unit is oriented towards a different street. This gives the two-unit house and the semi-attached house the overall appearance of a detached house when viewed from either street.

(b) The corner lot must comply with the minimum lot area standard of the subject zoning district. No lot with less than 3,000 square feet of lot area may be used for the corner lot option.

(c) Each dwelling unit within the two-unit house or semi-attached house must have its address, main entrance, and garage oriented towards a separate street frontage. Conversion of an existing detached house may provide one main entrance with internal access to both units.

Residential Infill Driveway Standards:

88-110-07 – Infill Residential Development Standards

88-110-07-E. Infill Vehicular Use Standards

a. DRIVEWAYS –

i. When an improved alley is present, driveways from the street are prohibited. For this section, improved shall mean paved with a hard surface or gravel. It shall not mean that such alleys must be improved to current Public Works Department standards.

ii. When an improved alley is not present, and more than half of lots in the context area are developed, driveways from the street shall be permitted only when both lots abutting the subject lot have a driveway from the street. For corner lots, driveways from the street shall be permitted only when the lot abutting the subject lot's side yard has a driveway from the street. The city planning and development director is authorized to allow

driveways from streets where neither abutting lot or only one abutting lot has a driveway from the street only when such a driveway is shared with at least one adjacent home, any garage the driveways lead to is not visible from the street, the driveway does not exceed 12 feet in width in the front yard, and subject to recording a cross-access easement.

iii. When an improved alley is not present and fewer than half of lots in the context area are developed, driveways from the street shall be permitted when the lots abutting the subject lot are both vacant or at least one abutting lot is developed with a driveway from the street. The driveway may not exceed 12 feet in width in the front yard and may not result in more than 40% of the front yard being paved.
