To whom it may concern:

I fully support amending this ordinance as I have witnessed the increase in bird and pollinator activity in my own lawn. We bought our house in the northland in 2020 and it was completely covered in grass with no signs of pollinators or birds. A month ago I counted over 15 bees on my hoary vervain plants and just this morning saw monarch butterflies, goldfinches, and hummingbirds feasting on my plants.

The educational seminars, vouchers, and overall support from the city of Kansas City to amend this ordinance would further increase the number of pollinators and birds in our area but also beautify the city while providing pollution and water run-off control.

Thank you for considering this!
