

# COMMUNITY PROJECT/REZONING

**210230**

## Ordinance Fact Sheet

Ordinance Number

**Case No.** CD-CPC-2020-00157

### Brief Title

A request to approve a rezoning from District R-6 (Residential dash 6) to District R-5 (Residential dash 5) on about 0.4 acres generally located at 2029 Summit Street, to allow for the construction of a new single-family residence.

### Details

**Location:** 2029 Summit Street

**Reason for Legislation:** Rezoning requires Council approval.

#### PLAN REVIEW

The applicant has submitted two applications: an area plan amendment and a rezoning application. In order to rezone to R-5, the applicant must first amend the Greater Downtown Area Plan (GDAP). The GDAP has a land use recommendation of Residential-Low and this amendment would change the recommended land use to Residential Medium.

As previously mentioned, the applicant also proposes to rezone the property. The need for the rezoning is due to the lot width. The subject site is 45.94 feet in width. The existing R-6 zoning requires a minimum of 50 feet of lot width and the proposed zoning of R-5 only requires a minimum lot width of 45 feet. This rezoning will bring the property into compliance with the R-5 lot and building standards and allow for the construction of a new single-family home. The applicant has provided a survey of the current lot width and the layout of the proposed home, shown below.

#### REZONING ANALYSIS

In reviewing and making decisions on proposed zoning map amendments, the city planning and development director, city plan commission, and city council must consider at least the following factors:

**88-515-08-A. Conformance with adopted plans and planning policies;**

The applicant has requested an amendment to the Greater Downtown Area Plan changing the recommended land use from Residential-Low to Residential Medium.

**88-515-08-B. Zoning and use of nearby property;**

Most of the nearby properties are zoned either R-6 or R-2.5. The proposed R-5 is in between both of those zoning districts and allows for

similar uses to the R-6 zoning specifically.

**88-515-08-C. Physical character of the area in which the subject property is located;**

The surrounding neighborhood is generally a mixture of single-family and multi-family structures with generally narrow lots. There are commercial properties to the south.

**88-515-08-D. Whether public facilities (infrastructure) and services will be adequate to serve development allowed by the requested zoning map amendment;**

The existing public facilities are adequate for the proposed request and subsequent development.

**88-515-08-E. Suitability of the subject property for the uses to which it has been restricted under the existing zoning regulations;**

The undeveloped portion of the property is currently unbuildable as it exists due to the lot and building standards. The current zoning only permits lots with a minimum of 50 feet of lot width. The current zoning does not seem to be suitable or the most appropriate zoning given the surrounding residences current lot widths.

**88-515-08-F. Length of time the subject property has remained vacant as zoned;**

The area that is proposed for construction of the new home has served as the side yard for the home to the north.

**88-515-08-G. The extent to which approving the rezoning will detrimentally affect nearby properties; and**

The proposed rezoning is not anticipated to detrimentally affect any nearby properties. The proposed zoning district of R-5 appears appropriate for the site.

**88-515-08-H. The gain, if any, to the public health, safety, and welfare due to denial of the application, as compared to the hardship imposed upon the landowner, if any, as a result of denial of the application.**

The hardship imposed upon the landowner would prevent the construction of a new home due to lack of lot width of the existing R-6 zoning of the property. There does not appear to be any gain to the public health, safety, or welfare due to the denial of the rezoning request.

**PROFESSIONAL STAFF RECOMMENDATION**

Staff finds that the site as it exists today is inadequate due to the lot width and prevents any new construction on the site. This is not the highest and best use for the property and as a result, CPC **recommended approval without conditions** of the requested rezoning based on the application, plans, and documents provided for review.
