Hello,

I am writing to express my support for adopting the climate protection plan which will enrich the livelihood of the KC Community at-large. By incrementally reducing our GHC emissions we are working toward a healthier, less carbon dependent, and more responsible future. The groundwork has already been documented as to which sources of emissions are most detrimental and the steps needed to mitigate this climate risk. This plan will only formalize the process and make a greater impact which is critical.

I sincerely hope that this vital step will lead to a resilient KC that we all know and love.
