

City of Kansas City, Missouri

Docket Memo

Ordinance/Resolution #: 250661 Submitted Department/Preparer: Water Revised 11/01/23

Docket memos are required on all ordinances initiated by a Department Director. More information can be found in <u>Administrative Regulation (AR) 4-1</u>.

Executive Summary

Authorizing a \$2,561,500.00 Professional, Specialized, or Technical Services contract with D3 Water, LLC, for Renewal No. 1 for the Sensor Network and Watershed Digital Twin project; and providing for four successive renewal options subject to City Council approval; and recognizing this ordinance as having an accelerated effective date.

Discussion

Reason for Contract

In 2010, the City of Kansas City, Missouri entered into a Consent Decree with the United States Environmental Protection Agency (EPA) to reduce wet-weather sewer overflows from the City's combined and separate sewer systems. This project is being undertaken to continue operating, maintaining, and expanding KC Water's existing sewer system Sensor Network data collection and delivery for multiple uses. System operational data will be used to perform data analytics in support of various sewer utility management functions including wastewater collection system preventative maintenance, wastewater treatment operations, Smart Sewer Program system planning and sewer system performance flow monitoring, green infrastructure performance monitoring, and Consent Decree compliance reporting. Data will also be used to develop and maintain watershed digital twins for each of the City's 13 watersheds to support the development of strategies for evolving data-driven system engineering, data dashboards and operational decision support systems.

Contract Description

The scope of work to be provided under this contract includes operating, maintaining, and expanding an existing sewer system flow and/or depth sensor network with up to 300 sensor locations, including site investigations, sensor repair or replacement and new sensor device installations; collecting and storing data with City access to real-time data via an online viewing platform; performing remote sensor monitoring and interrogation of real-time data for proper operation and timely detection of data loss or inaccuracies to trigger field services necessary to maintain consistent, reliable, quality data collection; development and maintenance of a digital twin for each of the

City's 13 watersheds; training for online data access and sensor equipment maintenance. The negotiated amount of the proposed Professional, Specialized, or Technical Services contract is \$2,561,500.00.

Ordinance No. 240074 approved the original Contract No. 1705 for \$2,561,500.00, along with five optional renewals that require further City Council approval.

Term

The term of this project will be 365 calendar days.

Solicitation

The Sensor Network and Watershed Digital Twin project was advertised in accordance with the City's requirements on August 16, 2023, and proposals were received on September 12, 2023, with two (2) proposers responding.

MBE/WBE Goals

CREO KC established goals of 11% MBE and 11% WBE on this project on June 20, 2023 as part of the Annual Goal Program.

<u>Awardee/Subcontracting Participation</u>

D3 Water, LLC submitted the lowest, responsible, and responsive proposal of \$1,888,855.00, with subcontracting participation of 11% MBE and 11% WBE.

Other Proposers/Subcontracting Participation

ADS LLC was the other proposer for this project. They submitted a proposal in the amount of \$2,780,448.00, with subcontracting participation of 0% MBE and 0% WBE (Contractor Utilization Plan documents were not received with Proposal).

Fiscal Impact

1.	Is this legislation included in the adopted budget?	⊠ Yes	⊔N
2.	What is the funding source? 26-8110-807769-B-60810123 = \$2,561,500.00 Overflow Con-	trol Progra	am

- 3. How does the legislation affect the current fiscal year?

 Work on this project will begin in the current fiscal year and extend into FY27.

 Invoices will be submitted by the Contractor on a monthly basis.
- 4. Does the legislation have a fiscal impact in future fiscal years? Please notate the difference between one-time and recurring costs.

 Funds encumbered in the current fiscal year will be disbursed over subsequent fiscal years as the work proceeds. Work on the project is anticipated to be complete within 365 calendar days from when work begins.

5.		Does the legislation generate revenue, leverage outside funding, or deliver a return on investment? No
