Executive Summary

A request to rezone 5015 Garfield Ave from R-6 (Residential) to UR (Urban Redevelopment), with associated Development Plan and Area Plan Amendment [Swope Area Plan, from Low-Density Residential to Residential Medium High], to construct low-income apartments on the subject site.

Discussion

Urban Redevelopment (UR) districts promote the development and redevelopment of underdeveloped and blighted sections of Kansas City by accommodating flexibility in design to help ensure the realization of the stated purposes of an approved plan for redevelopment. Development plans accompany these types of rezoning to allow for the City Council to review plans proposing significant development, to determine whether such plans further the purpose of the Zoning and Development Code.

The proposed project includes 45 affordable housing units (divided up between eight structures) with an interior parking lot.

At the City Plan Commission meeting, City staff presented the case and the applicant team spoke about their requests. Also neighbors appeared for testimony; they stated that while they are not opposed to the project, they have concerns about health, safety, shelter for inclement weather, traffic, parking, crime, and waste disposal. The applicant team responded that the units would have a safe space for shelter during inclement weather; waste will be collected in a dumpster during construction; they they have a budget for cameras and security; the amount of parking will suffice to accommodate the tenant's needs. In reference to traffic, Ahnna Nanoski stated that the Public Works Department determined that a traffic impact study was not necessary considering the amount of units. Commissioners approved the case with conditions. Motion passed 4:0.
