

We are opposed to the current development at 625 Prospect.

1. It is too large for this neighborhood. Adding 100 cars to our quiet neighborhood will destroy it.
2. The Northeast is already a known heat island. Turning this 1.2-acre field into impervious surface with a 92-car parking lot will increase the heat island.

We propose the size of this apartment/retail complex be halved, with the area zoned residential left as is, and homes or duplexes built there.

3. We would also like the city to address how they plan to prevent current residents and businesses being forced out due to increased rents and property tax.
