Maternal Child Health Block Grant

- This will be the fourth year of our annual grant that supports the MCH program which aims to prevent injuries and violence among infants, children, and adolescents by using CDC-based curricula to enhance social skills, relationships, and decision-making in youth aged 10-19 and their support networks.
- Our year 3 achievements include:
 - Provided advocacy training to 111 parents to enhance child outcomes during a 21-week cohort
 - Implemented evidence-based Violence Prevention education into 8 institutions reaching 696 students.
 - Partnered with local nonprofit organizations to engage a total 67,904 youth with violence prevention messaging through social media campaigns and 1-1 peer education using the S.A.V.E (Suicide Awareness and Anti-Violence Education) program
