Discussion

The City of Kansas City, Missouri previously commissioned the Westport Stormwater Management Plan (the "Plan") which identified certain strategies to better manage stormwater in flood prone areas and develop distributed green infrastructure where appropriate.

WRBL desires, in cooperation with City and in furtherance of the Plan, to engage a consultant for the purpose of providing engineering evaluations and preliminary design services for green infrastructure and distributed storage strategies to manage stormwater (the "Project") along Mill Street between the entrance to Manor Square parking garage south to 43rd Street.

By recommendation of its Public Improvement Advisory Committee, City has appropriated Five Hundred Ten Thousand and No/100 Dollars (\$510,000.00) in its Fiscal Year 2021-2022 budget and designated spending authority for said appropriation to the Water Services Department towards the cost of preliminary design and engineering services for the Project.

City and WRBL have determined that it is in the best interest of the parties to enter into a Cooperative Agreement for the management of the Design Professional Services on the terms and conditions set forth in this Cooperative Agreement.

In addition to the above, the Director of the Water Services Department is authorized by resolution to exercise Department's authority under the City Charter to execute this Agreement.

Details

Is it good for the children? Yes.

How will this contribute to a sustainable Kansas City?
 This project will contribute to a sustainable and resilient Kansas City by identifying solutions to better manage stormwater in flood prone areas in Westport with integration of natural systems where appropriate. This project will improve public safety and water quality, reduce heat-island effect, and will add resiliency to the community's sewer system.
