Subject: Resolution 220596 - climate plan
Date: Tuesday, August 23, 2022 12:31:11 PM

KC's Climate Plan is a step toward a good future for our community! We should start implementing simple ways for our citizens to be environmentally conscious. Our trash receptacles should be the same tri section receptacles that are used in California and Colorado and other states. Three sections are available in these receptacles marked: compost, recycling and landfill. This is a great way to help every person think about their impact and use of materials. Please consider implementing this step for our KC community.
