Subject: Design Professional Selection for Water Main Replacements Design Contracts in Fiscal Year 2024

On July 20, 2023, KC Water advertised and requested proposals/qualifications (RFP/RFQ) for design professionals to design and potentially assist in the bidding and construction of water main replacement projects. Below are the firms recommended by a 3-member KC Water staff-level committee. These recommendations are based on both the submitted proposals and past experience working with all of the firms.

Project Description

The 4 projects listed below are part of KC Water’s 100-year program that plans to replace at least 28 miles of the distribution system per year. These projects will replace aging, break-prone water mains with new zinc-coated, ductile iron pipe to increase distribution system reliability, hydraulic conveyance capacity, and fire protection.

MBE/WBE Participation

CREO set the MBE/WBE goals for all 4 projects at 14% MBE and 14% WBE business participation.
