Section 1. That the City Manager is hereby directed to develop a strategic sustainability plan for Community Action Network (“CAN”) Centers. Such plan shall describe the City Manager’s vision for Community Action Centers, including their function(s) and design, provide for their long-term sustainability over a ten-year period, and include specific strategies that encourage the ability of those centers to, within three years, effect immediate and transformative impacts on the community. In so doing, the City Manager shall solicit and incorporate appropriate input from stakeholders of all such Centers.

Section 2. That the City Manager is hereby directed to adopt an administrative regulation to guide City staff on the operation of any Community Action Network (“CAN”) Center that has been established within one year of the passage of this resolution, including the procedure for members of the community to host meetings or other events, and what services and supports will be offered, at such Center(s).

Section 3. That the City Manager is hereby directed to present the strategic sustainability plan, as described in Section 1 above, to the Council within 120 days, and is directed to present the administrative regulation, as described in Section 2 above, to the Council within 30 days.

Section 4. That the City Manager is hereby directed to present to Council, before or at the same time as the presentation of the annual budget, a five-year funding plan for Community Action Network (“CAN”) Centers that would allow City both to accomplish the goals set forth in the strategic sustainability plan described in Section 1 and to implement the procedures set forth in the administrative regulation described in Section 2. Such funding plan shall reflect a level of support for each Center that is commensurate with its respective ability to effect positive impact on the community.
