2. The developer shall secure approval of a street tree planting plan from the City Forester and plant according to said plan prior to recording the final plat.
3. The developer shall submit an affidavit, completed by a landscape architect licensed in the State of Missouri, verifying that street trees have been installed in accordance with the approved street tree planting plan and are healthy prior to a certificate of occupancy.
4. The developer shall submit an affidavit, completed by a landscape architect licensed in the State of Missouri, verifying that all landscaping required of the approved plan has been installed in accordance with the plan and is healthy prior to a certificate of occupancy.
5. The developer shall submit an affidavit, prepared by an engineer licensed in the State of Missouri, verifying that all outdoor lighting has been installed in accordance with approved plans and that lighting levels do not exceed that shown on the approved lighting plan at the property lines prior to a certificate of occupancy.
6. The developer shall secure approval of a final development plan from the City Plan Commission prior to building permit.
7. The developer shall grant on City approved forms, a stream buffer easement to the City or show and label the final stream buffer zones on the subdivision plat within a private open space tract, as required by Chapter 88 and Land Development Division, prior to issuance of any stream buffer permits.
8. The developer shall grant a BMP and/or surface drainage easement to the City as required by the Land Development Division, prior to recording the plat or issuance of any building permits.
9. The developer shall submit a macro storm drainage study with the first plat or phase, from a Missouri-licensed civil engineer to the Land Development Division showing compliance with current adopted standards in effect at the time of submission, including water quality BMP's, to the Land Development Division for review and acceptance for the entire development area, and submit micro storm drainage study with each subsequent plat or phase showing compliance with the approved macro and adopted standards. The developer shall secure permits to construct any improvements as necessary to mitigate impacts from rate, volume, and quality of runoff from each proposed phase, prior to recording the plat or prior to issuance of a building permit, whichever occurs first as required by the Land Development Division.
10. The developer shall secure permits to extend public sanitary and storm water conveyance systems to serve all proposed lots within the development and determine adequacy of receiving systems as required by the Land Development Division, prior to recording the plat or issuance of a building permit, whichever occurs first.
11. The developer shall obtain a floodplain certificate from Development Services prior to beginning any construction activities within the floodplain.
12. The developer shall submit plans for grading, siltation, and erosion control to the Land Development Division for review and acceptance, and secure a site disturbance permit for any

- proposed disturbance area equal to one acre or more prior to beginning any construction activities.
13. The developer shall pay impact fees as required by Chapter 39 of the City's Code of Ordinances, as required by the Land Development Division.
  14. The developer shall obtain the executed and recorded City approved grading, temporary construction, drainage/sewer, or any other necessary easements from the abutting property owner(s) that may be required prior to submitting any public improvements crossing properties not controlled by the developer and include said document(s) within the public improvement applications submitted for permitting
  15. The developer shall integrate into the existing streetlight system any relocated existing streetlights within the street right-of-way impacted by the new drive or approach entrances as required by the Land Development Division, and the relocated lights must comply with all adopted lighting standards.
  16. After the City Plan Commission enters its disposition for the development plan, the developer shall not enter into any agreement that would encumber or otherwise have any impact on the proposed right-of-way dedications for the planned project without the prior written consent of the Land Development Division.
  17. The developer shall subordinate to the City all private interest in the area of any right-of-way dedication, in accordance with Chapter 88 and as required by the Land Development Division, prior to issuance of any construction permits within said right-of-way, and the developer shall be responsible for all costs associated with subordination activities now and in the future.
  18. The developer shall submit covenants, conditions and restrictions to the Land Development Division for approval by the Law Department for the maintenance of private open space and enter into a covenant agreement for the maintenance of any stormwater detention area tracts, prior to recording the plat.
  19. The developer shall show the limits of the 100-year floodplain on the final plat and show the Minimum Low Opening Elevation (MLOE) of any structure on each lot that abuts a 100-year floodplain area (including detention basins and engineered surface drainage conveyances) on any plat and plan, as required by the Land Development Division.
  20. The developer shall cause the area to be platted and processed in accordance with Chapter 88, Code of Ordinances of the City of Kansas City, Missouri.
  21. The developer shall submit construction plans in compliance with adopted standards for all improvements required by the traffic study approved by the Public Works Department, and shall secure permits for those improvements as required by the Land Development Division, prior to recording the plat.
  22. The developer shall design and construct all interior public streets to City standards, as required by Chapter 88 and the Land Development Division, including curb, gutter, storm sewers, streetlights, and sidewalks.

23. The developer shall submit a final stream buffer plan to the Land Development Division for approval prior to issuance of any building permits and obtain permits for the stream buffer prior to removal of any mature riparian species within the buffer zones due to construction activities on the site, in accordance with the Section 88-415 requirements.
24. The developer shall dedicate additional right of way and provide easements for the frontage along North Green Hills Road as required by the adopted Major Street Plan so as to provide a minimum of 80 feet of right of way, and ensure right of way dedication is adequate for any proposed road improvements as required by the Public Works Department adjacent to this project.
25. Fire Department access roads shall be provided prior to construction/demolition projects begin. (IFC-2018 § 501.4 and 3310.1; NFPA 241-2013 § 7.5.5)
26. Fire apparatus access roads shall have an unobstructed width of not less than 20 feet (6096 mm), exclusive of shoulders, except for approved security gates in accordance with Section 503.6, and an unobstructed vertical clearance of not less than 13 feet 6 inches.
27. Dead end Fire Department access road(s) in excess of 150 feet shall be provided with an approved turnaround feature (i.e., cul-de-sac, hammerhead). Dead-end streets in excess of 150 feet in length resulting from a “phased” project shall provide an approved temporary turnaround feature (i.e., cul-de-sac, hammerhead). (IFC-2018: § 503.2.5)
28. The turning radius for Fire Department access roads is 30 feet inside and 50 feet outside radius. (IFC-2018: § 503.2.4)
29. Aerial fire apparatus access roads shall be provided for any building that is 30 feet in height or greater. Aerial fire apparatus roads are a minimum 26 feet wide, at least 15 feet away from the building but not more than 30 feet from the structure. (IFC-2018 § D105)
30. Required Fire Department access roads are designed to support a fire apparatus with a gross axle weight of 85,000 pounds. (IFC-2018: § 503.2.3)
31. The project will meet the fire flow requirements as set forth in Appendix B of the International Fire Code 2018. (IFC-2018 § 507.1)
32. Buildings equipped with a fire standpipe system shall have an operable fire hydrant within 100 feet of the Fire Department Connection (FDC). (IFC2018 § 507.5.1.1)
33. The Fire Department Connection (FDC) shall not be located that obstructs access/egress to the building when in use (IFC-2018 § 912.2).
34. Fire hydrant distribution shall follow IFC-2018 Table C102.1.
35. Where two fire apparatus access roads are required, they shall be placed a distance apart equal to not less than one half of the length of the maximum overall diagonal dimension of the lot or area to be served, measured in a straight line between accesses. (IFC-2018: § D104.3)

36. One and two family residential developments exceeding 30 dwelling units shall have at least two separate and approved fire apparatus access roads (IFC-2018: § D107.1)
37. The developer shall be responsible for dedication of parkland, private open space in lieu of parkland, or payment of cash-in-lieu of either form of dedication, or any combination thereof in accordance with 88-408. Should the developer choose to pay cash-in-lieu of dedicating all or a portion of the required area, the amount due shall be based upon the (2021) acquisition rate of \$48,801.37 per acre. This requirement shall be satisfied prior to recording the final plat or a certificate of occupancy, whichever is applicable to each phase of the project.
38. The developer shall submit a streetscape plan with street tree planting plan per 88-425-03 for approval and permitting by the Parks and Recreation Department's Forestry Division prior to beginning work in the public right-of-way.
39. The developer shall comply with the parkway and boulevard standards for all development along Tiffany Springs Parkway per 88-323.
40. Proposed trails shall be calculated per 88 408 H.
41. If N. Green Hills Road has not been improved to a 3-lane cross section at the time of Phase 2, as part of overall Phase 2 the developer shall construct a northbound left turn lane on N. Green Hills Road at N.W. Tiffany Springs Parkway with 250 feet of storage plus taper, prior to certificate of occupancy for any building in overall Phase 2.
42. For overall Phase 2, the developer shall construct a northbound right turn lane with 150 feet of storage plus taper on N. Green Hills Road at N.W. Old Stagecoach Road prior to a certificate of occupancy for any building in overall Phase 2.
43. If N. Green Hills Road has not been improved to a 3-lane cross section at the time of Phase 2, as part of overall Phase 2 the developer shall construct a northbound left turn lane on N. Green Hills Road at proposed Driveway #4 with 250 feet of storage plus taper, prior to certificate of occupancy for any building in overall Phase 2.
44. For overall Phase 3, the developer shall construct a southbound left turn lane with 250 feet of storage plus taper on N. Skyview Avenue at N.W. 108th Street prior to a certificate of occupancy for any building in overall Phase 3.
45. For overall Phase 3, the developer shall construct a northbound right turn lane with 150 feet of storage plus taper on N. Green Hills Road at N.W. Tiffany Springs Parkway prior to a certificate of occupancy for any building in overall Phase 3.
46. For overall Phase 3, the developer shall construct a northbound right turn lane with 150 feet of storage plus taper on N. Green Hills Road at proposed Driveway #7 prior to a certificate of occupancy for any building in overall Phase 3.
47. For overall Phase 3, the developer shall construct a southbound right turn lane with 150 feet of storage plus taper on N. Green Hills Road at N.W. Old Stagecoach Road prior to a certificate of occupancy for any building in overall Phase 3.

48. For overall Phase 3, the developer shall construct the eastbound approach on proposed Drive #6 at N.W. Old Tiffany Springs Road with two exit lanes prior to certificate of occupancy for any building in overall Phase 3.
49. As part of the required drainage studies, the developer shall provide analysis of erosion hazard potential for areas where any improvements or public right-of-way dedications are proposed within stream buffer zones or adjacent to the outside of stream meanders, including areas outside of the stream buffer outer zone, as appropriate and required by good engineering practices, to assess potential threats of future stream meander, cut, or erosion endangering or damaging facilities, structures, or property.
50. The developer shall follow the Kansas City, Missouri rules and regulations for domestic water and fire service lines.
51. The developer shall submit water main extension drawings prepared by a registered professional engineer in Missouri to the main extension desk for review, acceptance and contracts per the Kansas City water rules and regulations for water main extensions and relocations.
52. The developer shall submit a preliminary stream buffer plan in conjunction with the final development plan for each phase of the development in accordance with the Section 88-415 requirements.

A copy of said development plan is on file in the office of the City Clerk with this ordinance and is made a part hereof.

Section C. That the Council finds and declares that before taking any action on the proposed amendment hereinabove, all public notices and hearings required by the Zoning and Development Code have been given and had.

---

I hereby certify that as required by Chapter 88, Code of Ordinances, the foregoing ordinance was duly advertised and public hearings were held.
